

For health...with pleasure!

Dear Sirs,

"Aroniada-Agro" Ltd. is established in 1995 and from 2002 the firm is developing activity - growing lasting plantations of Aronia (black chokeberry) fruit and producing natural organic beverages from fresh Aronia fruits.

At this moment this activity appears to be priority for the "Aroniada-Agro" Ltd. The firm holds more than 100 acres plantations of Aronia in an ecologically clean area with registration for organic production since 2005 until now.

We are pleased to present to your attention our products with natural content of vitamins:

- **Organic Juice of FRESH ARONIA fruits (*Aronia melanocarpa*)** - glass bottles 300 ml, 500 ml, 750 ml;
- **Organic Natural Vitamin drink from Aronia (5% alc.) (wine)** - glass bottles - 500 ml
- **Organic Natural Vitamin drink from Aronia and grape (8% alc.)(wine)** - glass bottles – 375 ml, 500 ml
- **Organic Aronia powder** – pouches - 200 g;
- **Organic Dried Aronia** – bags - 100 g;
- **Organic Aronia Vinegar** – glass bottles - 250 ml, 500 ml;
- **Dragee Aronia with dark chocolate** – box -100 g.

The beverages are made ***only from selected fresh and undamaged organically grown Aronia (Chokeberry) fruits right after harvesting the yield.***

The juice is produced through cold pressing in order to preserve to best possible extent the rich biochemical content of the berries in the final product- vitamin P, vit.C and others. It is not from concentrate or frozen fruits, which distinguishes it from all previously offered juices. This explains the strong impact of the human body.

100 % ARONIA Juice – No Sugar! No additives! No preservatives!

The live Organic Juice of fresh Aronia fruits is a functional drink with a good taste and proven healing properties. A fact that has been proven in a number of medical researches. We have certificates for organic production according to European and Japanese standards for organic production, Halal certificate, Kosher certificate, analysis of non-radiation, tests for the presence of vitamins, medical research conducted with our juice.

The juice from fresh Aronia fruits should be consumed in small quantities on a reception - 30 to 50 ml and wonderfully combined with fresh kiwi, orange, apple, carrots and other fruits. The received vitamin cocktails are exclusively delicious, enjoyable and useful for every age and season. Very healthy and tasty is the combination with Bulgarian yoghurt in which can be added also honey, muesli depending on the taste.

Consumption of Aronia berry juice may have a beneficial effect on many diseases:

- Cardiovascular diseases
- Disturbed lipid and carbohydrate metabolism (diabetes).
- Hypertension.
- Chronic obstructive pulmonary disease.
- Chronic colitis and chronic gastritis.
- During the period of recovery after severe acute diseases.
- During chemotherapy and radiation therapy.
- In the post-operative period following serious surgical interventions.
- After suffering a brain stroke.
- Diseases of the superficial and deep veins.
- Mild cases of haemorrhoids.

For health...with pleasure!

- Erectile dysfunction in men.
- Difficulty in defecation.
- Chronic pains of the musculoskeletal system.
- Diseases of the thyroid gland.
- Headache "without cause" (when brain tumor is ruled out).
- Disorders of the peripheral nervous system, sciatica, plexitis, inflammation of the facial nerve, diabetic polyneuropathy (together with alpha-lipoic acid).

We would like to let you know that our Japanese partner has team of researches which already have registered several medical researches about healthy effects of regular usage of our Aronia juice. We also have supported medical researches in Bulgaria. In attached files you will find them.

Natural vitamin drink (wine) is a product entirely from natural fermentation of Aronia juice and has a low alcohol content, high in vitamins, unique high extract and very low in sulfites. It is suitable even for athletes, as instantly gives energy and helps rapid absorption and leftover food. We recommend to be used mostly as digestive after meal – 1 glass well chilled wine from aronia speeds up metabolism and helps for the faster absorption of the food.

Organic Aronia powder can be used as a supplement to yoghurt, smoothies, and raw and baked cakes. We recommend soaking 10 g of the aronia powder in a bowl of yoghurt in the evening and eating it in the morning. The cleansing effect is due to the lactobacilli fed on the aronia powder. The absorption is greater due to the larger area of action on the mucous membranes of the intestines. High organic iodine content.

Organic Aronia vinegar - It is produced by natural fermentation of 100% cold pressed juice from organically grown Aronia berries. The vinegar is with a natural concentration of essential bioflavonoids (anthocyanins, flavones, catechins), together with other natural vitamins (C, B1, B2, etc.), and biologically active substances. The strong antioxidant and the invigorating effects are due to them. The unique high extract and low acidity help for optimal absorption by the body. It is used for flavoring salads and dishes - it gives them a saturated and unique taste combined with health benefits. Can be used as a detoxifying drink - 1 teaspoon is diluted with water and sweetened with honey or fruit juice. It has much more strong effect during all kinds of diets for reducing the weight because as opposed to the apple for example it contains bioflavonoids and natural sorbitol. The natural sorbitol contained in the Aronia fruits belongs to the group of natural sweeteners known as polyols. It can also be used by diabetics as it almost does not effect on the blood sugar levels. Excessive use of sorbitol may result in laxative effect.

Aronia dragee with dark natural chocolate - an unique combination of natural chocolate and whole fruit aronia. The perfect company for every exquisite alcohol, as well as morning coffee. Natural energy source. Sweet and healthy delight.

Aronia itself is a super food because it contains all the essential vitamins quantities above average, but the presence of bioflavonoids is an absolute record. All our products are with rated values of bioflavonoids. It also contains anthocyanins, flavones and catechins

The most valuable property of bioflavonoids, which determines all the healthy effects on the body is that increasing the effects of vitamin C on the human body. Along with vitamin C they maintain healthy each connective tissue by inhibiting the degradation of collagen and stimulate the construction of a new one. Furthermore, stimulate the regeneration of muscle and bone tissue, increase the strength and elasticity of the blood vessels. At the same time, they prevent the oxidation of cholesterol, reduce its level in the blood, reducing its ability to form plaques and prevent arterial formation of clots in blood vessels. Their strong antioxidant effect is in the connection of free radicals, degradation and removal from the body. Moreover, bioflavonoids have expressed anti-inflammatory, anti-allergenic, antiviral and anticancer properties.

Another valuable feature of the bioflavonoids is their ability to neutralize and remove heavy metals and radioactive elements from the body falling into it in different ways.

Particularly valuable feature of bioflavonoids is that they are absorbed and cleared out very quickly and easily by the body due to water soluble structure. For all the properties or effects, they are extremely beneficial for athletes.
