High-quality PVC products

## MANUFACTURE OF HIGH QUALITY PVC PRODUCTS

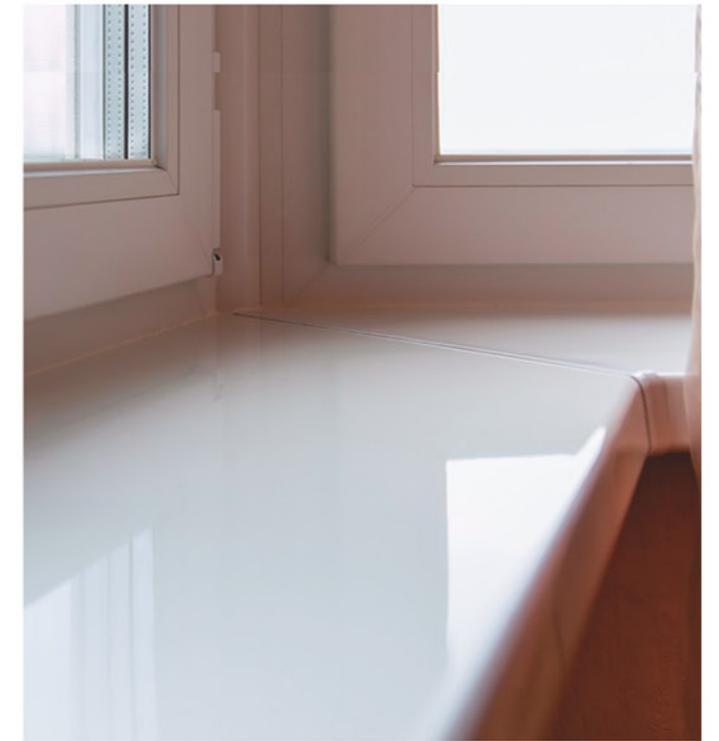

**PLASTIC PANELS**

**PVC CEILING PLATES**

**GLOSSY PVC PLATES AND MOLDINGS**

**WINDOW STOOLS AND SILLS**

# ABOUT COMPANY

The company "Obltorgservis" is one of the leading manufacturers and suppliers of high-quality PVC products on the Ukrainian market. PVC panels, PVC ceiling plates, profiles for manufacturing reinforced-plastic structures, window stools and sills, and the necessary accessories are produced under the brand name Brilliant.

Brilliant is a full production cycle plant, which includes: extrusion lines for panels and profiles, window stools and sills, products decoration workshop, lamination workshop. Strict quality control is applied in the process of goods manufacture at all stages: from raw materials acceptance to finished products output.

Continuous improvement of product quality and high level of service are top targets of "Obltorgservis".

## <20 YEARS

in the Ukrainian market  
of PVC products

## 22 EXTRUSION LINES

Availability of massive production  
capacity allows producing  
more than 150,000 m<sup>2</sup>  
of panels per month

## WE ARE WORKING WITH

БУДІВЕЛЬНИЙ  
СУПЕРМАРКЕТ

## LOGISTICS

Our company delivers  
products to any  
destination  
within Ukraine

## RELIABILITY

We work with a large number  
of private entrepreneurs, large  
distributors and hypermarkets  
in Ukraine

# WHAT DO WE OFFER?

## PERSONAL DISCOUNTS

*We provide each our client with personalized service in providing the best conditions for cooperation*

## CONSULTING

*Each of our clients is assigned a personal manager who provides consultancy support, ensures promptness and accuracy of order processing*

## TRAINING

*We provide educational resources and train sales personnel*

## ADVERTISING

*We provide advertising products: flyers, catalogs, posters. We provide marketing and information support*

## SAMPLES

*All clients receive the required number of samples from TOP collections of our products and stands for their outlets*

## PROMOTIONS

*Regular promotions for clients: special offers; discounts on collections; discounts on new decors*

# WHY US?

1

## FULL-CYCLE PRODUCTION

This makes it possible to control the quality of producible articles at all stages of production

2

## PERSONAL SERVICE

If necessary, we can produce new collections and types proposed by you as soon as possible

3

## PROMPT ORDER FULFILLMENT

Our modern equipment and production facilities allow us to fulfill orders of almost any volume

4

## LOGISTICS

We carry out regular deliveries in Ukraine. We own a vehicle pool

5

## SUPPORT OF PROMOTIONAL PRODUCTS

We provide our partners with catalogs, flyers, stands, samples of products, and training documents

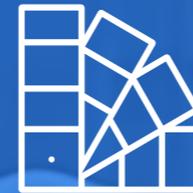

6

## PRODUCT QUALITY

Availability of all regulatory documents, including necessary certificates and permits

7

## EXTENSIVE PRODUCT LINE

More than 300 items. Huge variety of colors and patterns

8

## CARE FOR THE ENVIRONMENT

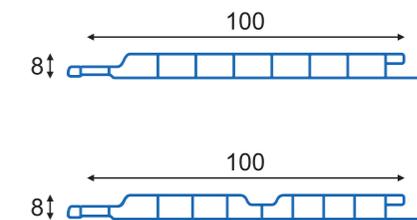

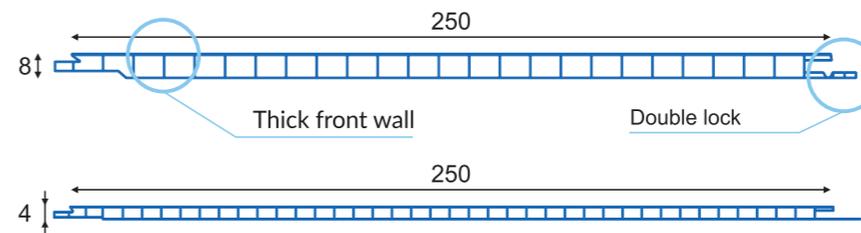

Our products are suitable for full recycling for further use

## PLASTIC WALL PANELS:

Plastic panels are one of the most widely used finishing materials. They perfectly cover ceiling unevenness and are often used in bathrooms, living and utility rooms.

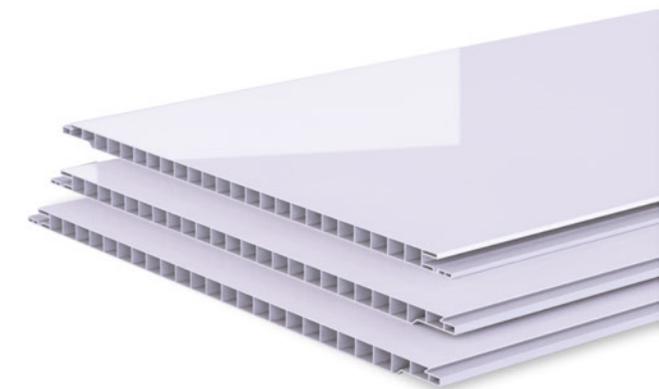

Exquisite design and absence of seams make a multi-functional panel with various designs a very popular article of our catalog, which can bring a cozy atmosphere to your home.

Plastic panels are produced with the following dimensions:

Width:	Length:	Thickness:
100; 250 mm	3 000; 6 000 mm	8; 4 mm

All the necessary connecting elements for panels of this type are available.

## ADVANTAGES OF PLASTIC WALL PANELS

### MOISTURE RESISTANCE

Absolutely not exposed to moisture

### ARE NOT FLAMMABLE

Reduce the risk of fire

### NON-TOXIC

Made of completely harmless components

### DESIGN

A variety of decors can be applied on panels, specifically: marble, wood, abstractions

### SHOCK RESISTANCE

It is achieved due to a large number of partitions and a thick front wall

### EASE OF INSTALLATION

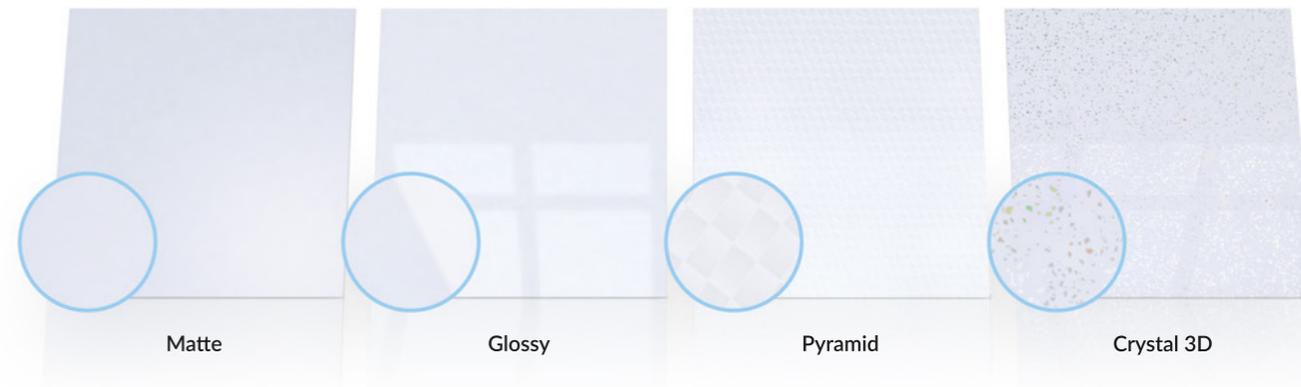

Can be repaired by a person without special skills

## CEILING PANELS:

Ceiling panels are made similar to plastic wall panels, and have longitudinal stringer inside, which provides them with additional rigidity. Unlike mineral fiber plates, PVC plates do not sag in premises with high humidity. And they are mounted similarly to "Armstrong" ceiling plates, which makes their installation quick, clean and convenient.

These ceiling products can be matte, glossy (lacquered) and with a variety of textures.

Width:	Length:	Thickness:
595 mm	595 mm	8 mm

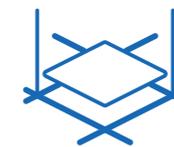

We can also produce these panels with other length, but the width will remain 595 mm and thickness - 8 mm.

## ADVANTAGES OF CEILING PANELS

### MOISTURE RESISTANCE

Ceilings of plastic panels are installed in bathrooms and toilets, as well as in kitchens and hallways

### SUSPENSION CEILING CONSTRUCTION

Used to easily hide engineering communications (pipes, cables and wiring), as well as ceiling defects

### EASE OF CARE

Allows to use in premises with strict requirements for hygiene, such as schools and hospitals

### ABSENCE OF NECESSITY TO APPLY FINAL PAINTING

Material is already coated with paint and ready for use

### DESIGN

Variety of colors and patterns on plates

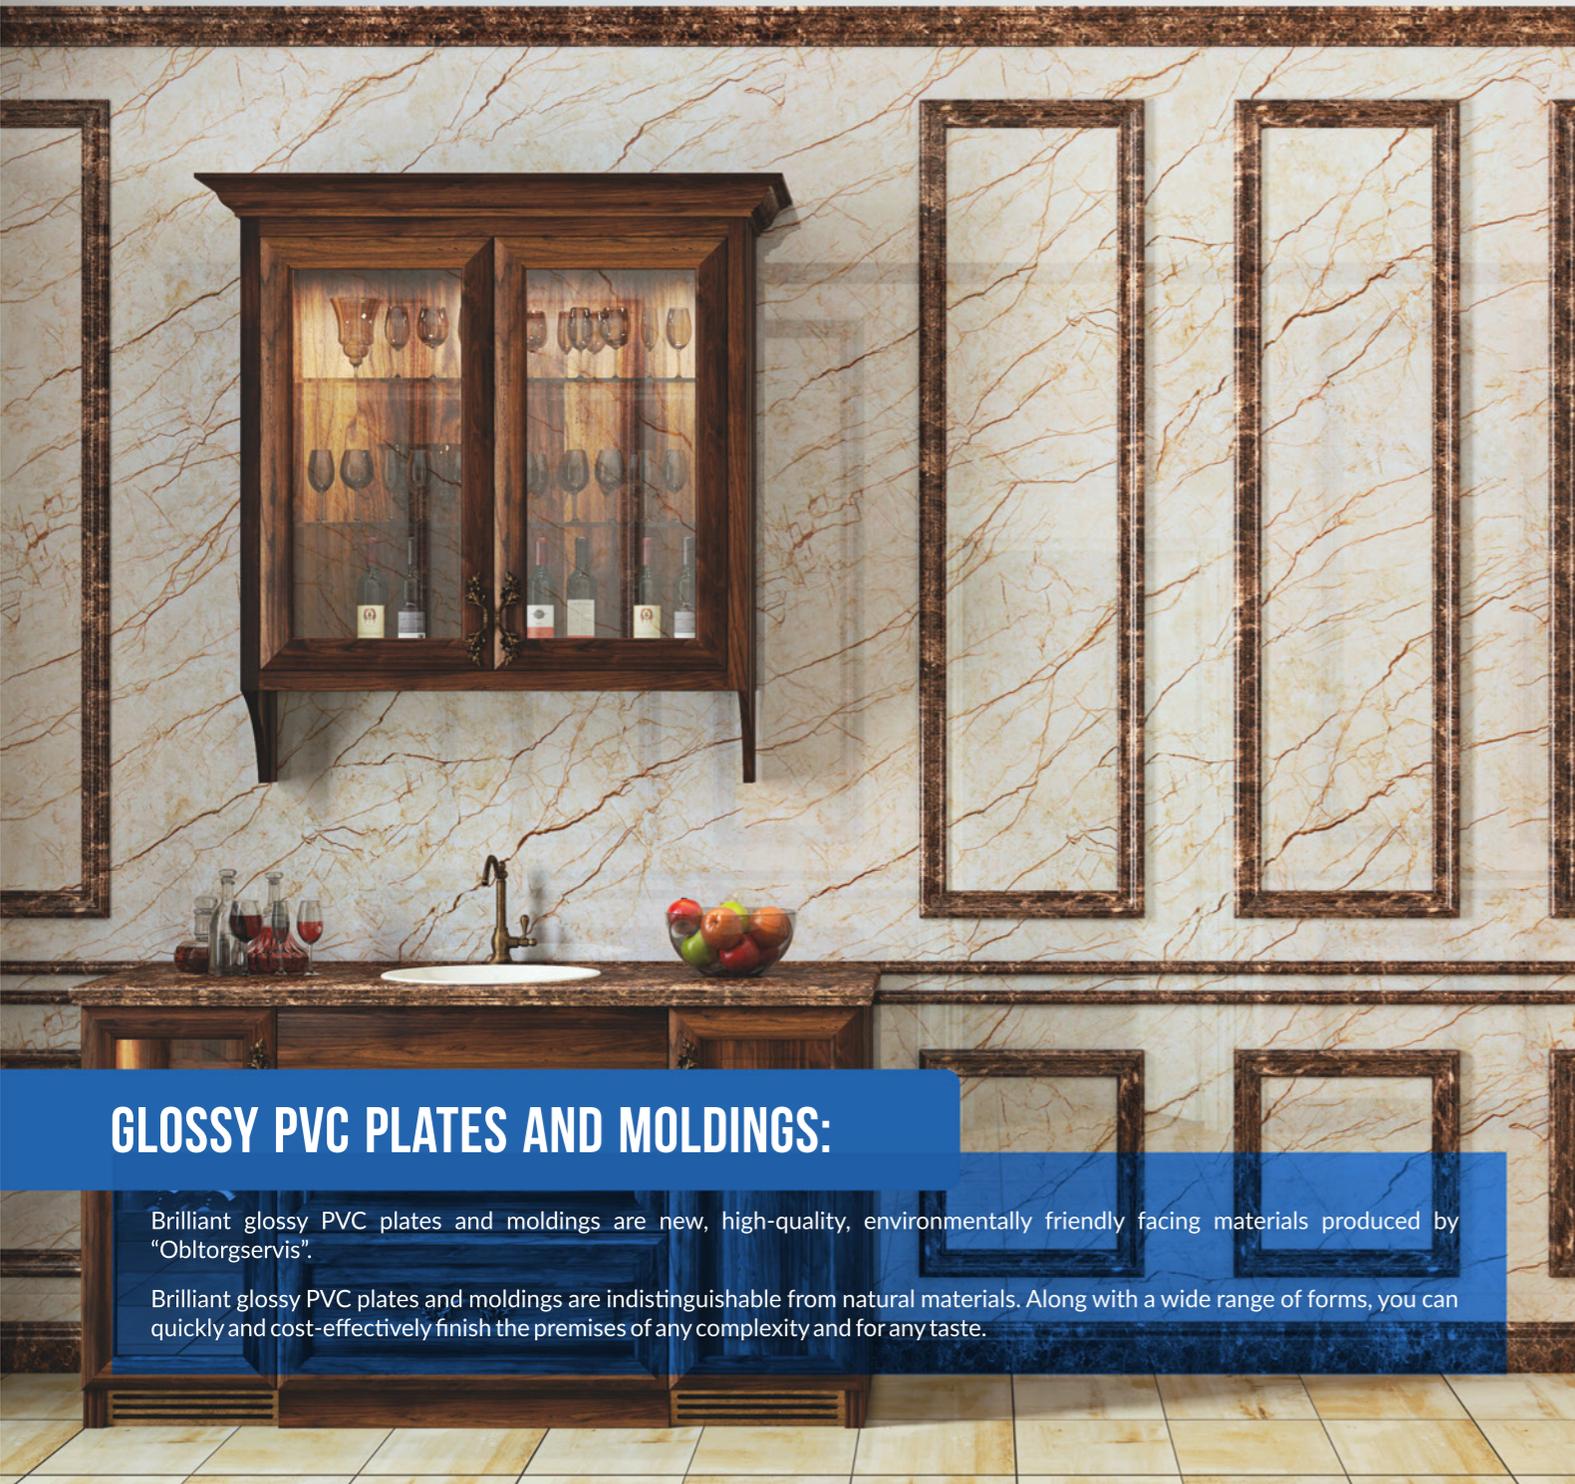

### RELIABILITY AND DURABILITY

unlike similar ceiling plates from other producers

### ARE NOT FLAMMABLE

Reduce the risk of fire

## GLOSSY PVC PLATES AND MOLDINGS:

Brilliant glossy PVC plates and moldings are new, high-quality, environmentally friendly facing materials produced by "Obltorgservis".

Brilliant glossy PVC plates and moldings are indistinguishable from natural materials. Along with a wide range of forms, you can quickly and cost-effectively finish the premises of any complexity and for any taste.

## ACCESSORIES FOR GLOSSY PVC PLATES

## ADVANTAGES OF GLOSSY PVC PLATES AND MOLDINGS:

### MOISTURE RESISTANCE

Absolutely not exposed to moisture

### EASE OF INSTALLATION

Allow you finish the premises of any complexity and for every taste quickly and inexpensively

### ARE NOT FLAMMABLE

Reduce the risk of fire

### DO NOT REQUIRE PROCESSING AND PAINTING

Plates and moldings are ready for use

### HIGH SHOCK RESISTANCE

Is achieved due to overall structure and quality of the material

### INDISTINGUISHABLE FROM NATURAL MATERIALS

They have bright, saturated colors, and a beautiful glossy surface

## WINDOW STOOLS:

A distinctive feature of our window stools is their high quality base which is achieved due to diagonal baffles and thick surface. We produce moisture resistant window stools of classic white color with a matte and glossy high-quality film from leading German film producers.

As for thermal insulation performance, PVC window stools surpass window stools made of stone and wood.

Glossy

Matte

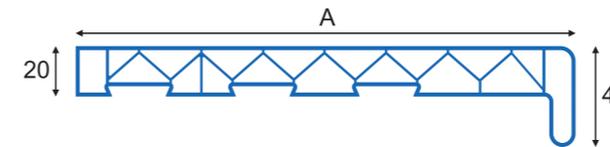

Golden oak

Marble

We can also apply other colors under to order (marble, wood).

Width of window stools (A)
200, 250, 300, 350, 400, 450 mm

All window stools are made 3 and 6 m long, but we can also customize them to order. They are provided in a set of 2 pieces. We also offer end caps for window stools.

## ADVANTAGES OF WINDOW STOOLS

### STIFFENING RIB

vertical and diagonal ones, which significantly increase window stool rigidity

### MOISTURE RESISTANCE

Resistance to moisture and microorganisms

### EASE OF CARE

Non-sensitive to household chemicals, as well as resistant to long-term heat loads

### DURABILITY

Durable construction is in practice not exposed to any impact and can withstand heavy load

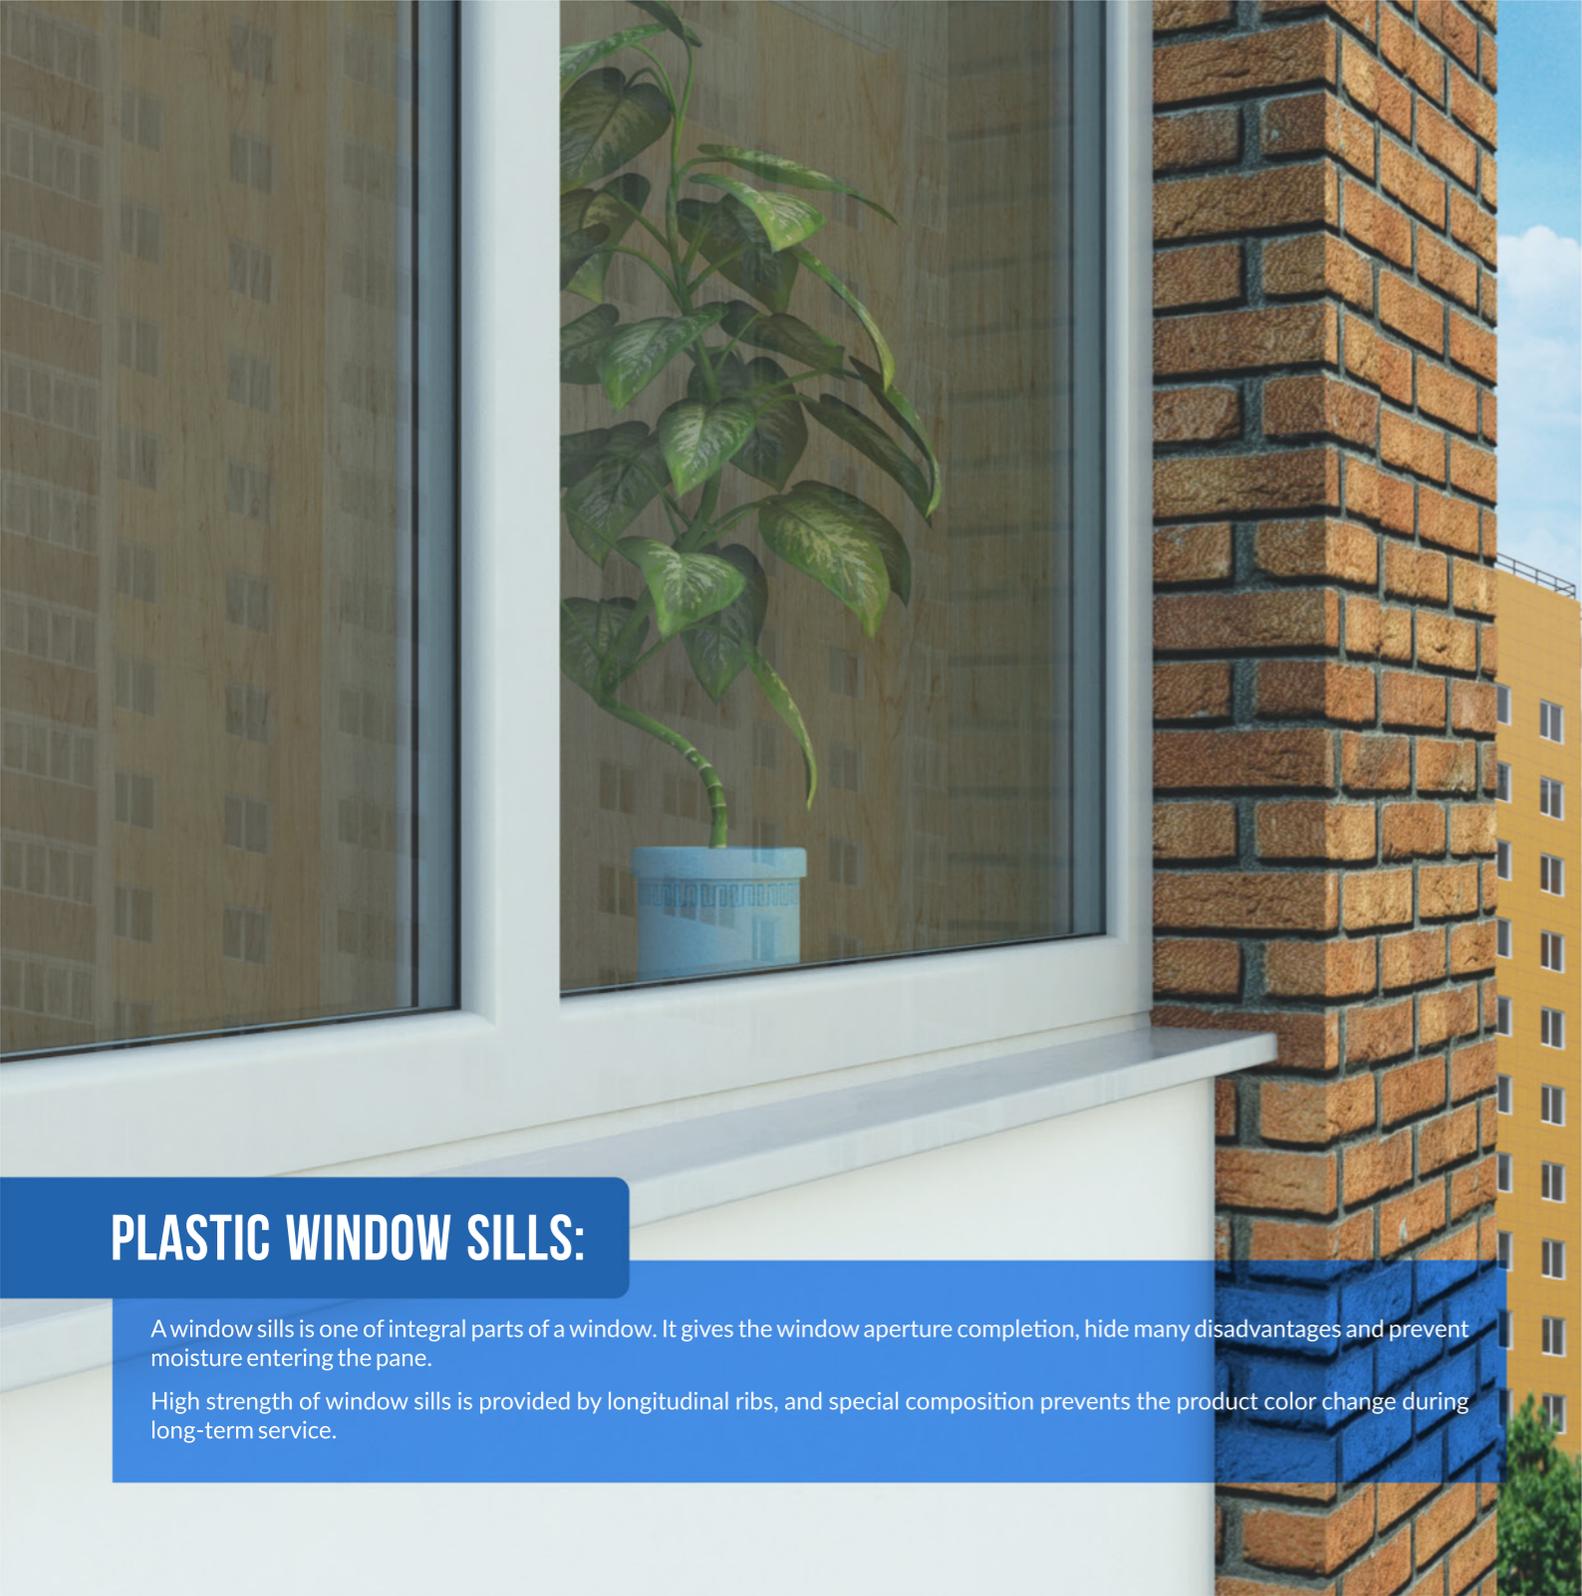

### RESISTANT TO SOLAR RADIATION

Do not fade, do not turn yellow, do not disintegrate

### RESISTANT TO MECHANICAL WEAR

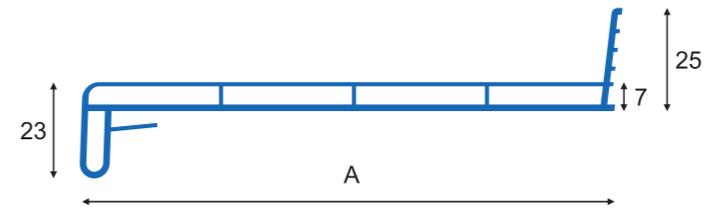

Window stools have high integrity, are light and resistant to damage, scratches and high impact

## PLASTIC WINDOW SILLS:

A window sill is one of the integral parts of a window. It gives the window aperture completion, hides many disadvantages and prevents moisture from entering the pane.

High strength of window sills is provided by longitudinal ribs, and special composition prevents the product from changing color during long-term service.

Width (A):	Length:	Plastic thickness:
110, 130, 150, 180 mm	3000; 6000 mm	1,5 mm

We can change their size to your order. If desired, we can equip window sills with end caps.

## ADVANTAGES OF PLASTIC WINDOW SILLS

### HIGH OUTDOOR RESISTANCE

Resistant to constant exposure to low or high temperatures, as well as to sudden temperature drops

### RESISTANT TO SOLAR RADIATION

Retain bright white color for long

### DURABILITY

Easily withstand any possible mechanical impact: snow, birds, falling objects

### NOISELESSNESS

Unlike metal ones, PVC window sills are not noisy and do not sound when drops of rain or hail hit the boards

### EASE OF INSTALLATION

Window sills can be mounted by own efforts

### EASE OF CARE

They are easily cleaned of dirt and dust, resistant to household chemicals
